- Research, Innovation, Innovation Support Programmes, Seminars

LOBBYING

GKV bundles and represents the common interests of its member associations und works as a voice against politics and the public.

GKV is organised in the Federation of German Industries (BDI) and thus ensures, that the interests of the plastics converting industry will be taken into account in political decisions on national level.

About 80 per cent of the sector-specific regulations are enacted in Brussels. Efficient lobbying on European level is indispensable for this. GKV is original member of the European umbrella organisation European Plastics Converters, representing the common positions of our industry against the EU.

KEY DATA

- 316.000 Employees
- 2.853 Business firms
- ca. 59,8 billion € annual turnover
- Exports: 37 per cent

Data: GKV 2016
